## Federal Census Index
## 1930

The Paulding County Chapter of the Ohio Genealogical Society is pleased to present its latest book. This book completes the published Federal Census Indexes for Paulding County. Our complete collection of census indexes, 1830-1930, are at the Paulding County Carnegie Library in Paulding, as well as several libraries around the country, including the Ohio Genealogical Society's library in Mansfield, Ohio and the Allen County Public Library in Fort Wayne, Indiana.

Our many thanks to Glenna Bennett Doster and Dorthy Hasselschwert for all their hard work on this project. By using other indexes and references, Glenna and Dorthy tried to be as accurate as possible with the transcription of the names. Any errors found are not intentional.

Ohio became a state in 1803. The first federal census for Ohio was in 1820. Paulding County is situated in the northwest corner of Ohio. It was one of the last counties formed in the state. The first census for Paulding County was 1830.

The population of Paulding County peaked around the turn of the last century. The 1900 census showed a population of approximately 25,000 in the county. By comparison the 1920 census listed a population of around 18,000 and the 1930 census over 15,000. Paulding County's current population is around 21,500.

The society would also like to express its gratitude to Ray Keck, Pete Vitello of Ohio and Florida, and Malcolm Evett of California who indexed the previous census records and Marilyn Smith who did the tedious job of extracting the information off the microfilm rolls so that information could be sent to Pete and Malcom for indexing.

Thank you to all of our members who support the society by buying our books.

Terri L. Gorney, President
Paulding County Chapter OGS

16 May 2005
